

ONLINE ORIENTATIONS

Online Employee and Contractor Onboarding

Streamline your **organization's onboarding process** by reducing administration and having everything completed before workers or contractors show up on site.

Securely store orientations on AWS cloud servers for remote access from anywhere

Keep records of completed orientations for every employee and contractor

Create custom content specifically designed for your business and policies

Streamline your onboarding process with the latest innovations in online training

Let us help you implement adaptive learning that can provide experienced workers and contractors with high level updates, key information, and brand new knowledge while providing new workers and contractors all the in-depth information, background knowledge, and learning needed to get up-to-speed.

Full Customization

Virtual Proctoring

Using the employee's webcam, we can virtually proctor your orientation, ensuring users pay attention to the content and verifying their identity.

Certificate Upload Technology

Workers can upload all their historical training directly into the orientation. These records will automatically populate in their account after being verified by a supervisor or manager.

President's Message

Using technology as simple as a cellphone, it's easy to take a video of the president addressing the team, then upload the message directly into the orientation.

Mainstream Multimedia

Admins can upload your current orientation directly into the system, whether it consists of video, HTML5 files, or PowerPoint slides. Workers can then access it through any internet-ready mobile device.

Self Registration

By creating a website link to your orientation, you can have contractors or employees simply click to access the orientation, setting up an account for themselves in minutes.

Exam Engine

Using the system's integrated exam engine, it's easy to pepper questions throughout the material for higher levels of employee engagement and knowledge retention.

Digital Forms

Digital forms can be included as part of the orientation, allowing employees to complete all of their policies, procedures, self-identifications, medical questionnaires, etc. right inside the course.

SCORM Compliant

Both SCORM 1.2 and 2004 files can be uploaded directly into your orientation for easy access.

Ready to Work on Day One!

With online orientations both your employees and contractors have access to orientation material the minute you add them to the system. Full and part-time workers can access the orientation from home and arrive at their job site, ready to work!

The system sends your Human Resources department and supervisors the proper paperwork the second the course is complete. Give gate security an easy way to check if employees or contractors are validated for entry. All of this and more is possible with online orientations.
